### A word from the President – Frauke Müller

Dear members of the IADR Prosthodontic Group  
Dear colleagues and friends,

Two more weeks, and then we shall meet at the IADR General Assembly in London. Two more weeks, to plan your schedule, arrange for meetings with friends and colleagues, and prepare your oral and poster presentations. And two more weeks until the Business meeting of the Prosthodontics Group, to which you have subscribed. A lot has been achieved in the last year, and a milestone of our activities has been taken care of by our incoming President Matthias Kern: he has modernised and updated our website, with a fresh look, a higher security level and an updated and more comprehensive contents. Please go and visit <http://www.iadr-prosthodontics.org/> to appreciate the wealth of information, links and photos provided. Thank you Matthias ! It was time for this update with a fresh look and content.

Another big thank you has to go to Joke Duyck and the abstract reviewers who did a remarkable task in reviewing over 150 abstracts and allocating them to 7 oral sessions and 6 poster blocks. The programme reflects the wealth of knowledge and competence of our Group in the domain of prosthodontics, and you will find in our scientific programme the cutting edge of today's prosthodontic research. In addition, we are proud to announce 4 Symposia, which have been put together by Joke Duyck, David Bartlett and others in collaboration and co-sponsorship with other groups. These sessions are not dedicated to original research data, but rather provide an overview on the available evidence in a chosen field. Independent sponsorship was obtained, and will be warmly acknowledged during the sessions. This year, our Group also offers a Lunch&Learning event, chaired by our incoming President Matthias Kern. The latter is a guarantee of a scientific quality, as for the British lunch – we shall see ☺ . Over 30 submissions have been received for the Research Awards from members of our group, an outstanding achievement reflecting the popularity of the Academic Distinctions the Prosthodontics Group has to offer for younger researchers. Please

come to attend the Business meeting, during which these Awards will be presented to the winners. Your presence will make them proud and encourage the next generation of prosthodontists to follow an academic path. The traditional reception is another fantastic opportunity for everybody to network, meet old friends and make new ones, and to exchange ideas and experience in the prosthodontic area.
